# INNOVATION INSPIRED BY YOU.™

## SMART INNOVATION FIRST.

USG Middle East (USGME) is a Joint venture between USG Corp–USA (USG), Boral–Australia (BLD.AX), and Juman Industrial Investment Company–Saudi investor in the Building Materials segment (juman.sa). Since being founded in Dammam, Saudi Arabia in 1985, USGME has been a leading manufacturer of Ceiling, Interior Finishing, and Drywall Partitions.

Our products are supplied to more than 45 countries through 4 regional manufacturing plants via a wide network of sales and technical offices and distributors. Our product range is trusted for use in homes, offices, hospitals, schools, universities, cinemas, and retail spaces, as well as in many of the world's most iconic projects.

**Our mission** is to deliver innovation that helps you work smarter, do more, and build better. Architects and construction companies need safer, faster, and less costly ways to build. Building owners need better running buildings with lower operating costs. And the need for sustainable construction to address global environmental challenges is growing fast. That's why throughout USG's history, we have continually developed innovative wall and ceiling products and systems for our customers.

## INNOVATION AND SUPPORT YOU CAN TRUST.

USG Middle East's ever-growing portfolio of groundbreaking products and end-to-end solutions is backed by unparalleled quality service. With an extensive distribution and sales network operating for more than 35 years across the MENA Region, our dedicated teams provide local expertise and high levels of support in finding the right solutions for your needs.

USG Middle East's main product categories are:

**Ceilings:** With over 35 years of experience, we are a premier acoustic panel and specialty ceilings innovator that enhances the overall aesthetic of our customers' projects. Our portfolio includes acoustical, gypsum tile, metal, and specialty ceilings, as well as both standard and seismically rated suspension systems.

**Plasterboard:** Used to make interior walls and ceilings, our plasterboards are the result of over 100 years of scientific experimentation and success. Cleaner, faster, and more easily handled by fewer workers, we have installed more than 725 million square meters of plasterboard worldwide.

**Substrates:** Compared to traditional wet wall solutions, our substrates are versatile and lightweight—thereby reducing installation costs while speeding up construction. This is ideal for unique building designs as they can be curved and applied to various finishes, including paint, tile, stone, and textured.

**Metal framing:** Our range of metal components and profiles allows the construction of drywall and ceilings to be completed faster, more accurately, and cleaner than conventional methods. This state-of-the-art framing can be engineered to suit a job site's requirements while achieving industry standards.

**Interior Finishes:** Used for jointing, bonding, skimming, and creating textured finishes for building interiors. We boast a broad range of products for compounds, along with our extensive capability to formulate solutions according to your needs.

# CEILING

## METAL CEILING SOLUTIONS

---

Great design is a lot more than just an aesthetic. USG Middle East Celebretto Specialty Ceilings' Solutions offers an extensive range of modern ceiling designs that fit a range of commercial and residential applications.

Your spaces will dazzle with many Baffles' designs, Hook-On, Geometrix, or Lay-In panels—all

made from sustainable metal materials with a variety of high-performance sound-proof designs and materials that can absorb up to 1.0 NRC.

Celebretto Specialty Ceilings' Solutions is available in an array of attractive colors, finishes, and patterns to choose from.

## ACOUSTICAL DRYWALL CEILING

---

USG Middle East drywall ceilings offer an elegant, one-of-a-kind aesthetic to your projects. Our acoustical drywall ceilings are made of non-combustible, lightweight gypsum. They are perfect for a variety of sound absorption applications, enhancing the visual aesthetic, and are simple to install and maintain.

We offer both of Monolithic and Perforated drywall ceiling options. Monolithic Acoustical Ceiling panels

provide your space with elegant seamless white or multicolored finishes, while the uniquely perforated Skyrock Ecoblock gypsum ceiling panels provide you with eye-catching aesthetics and comply with ASTM C423 and ASTM E84 for noise reduction and fire propagation classification. We offer a variety of perforation patterns and designs to meet the growing demand for acoustical drywall ceilings.

## SOFT FIBER CEILING

---

Choosing the best Acoustical Ceiling for your project can make all the difference, as ceilings are one of the most visible elements in any building. USGME has an unparalleled variety of choices of soft fiber ceilings, including Glass Wool and Stone Wool. No matter what your ceiling needs may be, we have you covered.

From sound absorption and sound reflection to fire performance, light reflectance, durability to aesthetics, with USGME, you will find the perfect panel or tile for your projects. We offer Soft Fiber ceilings that can achieve 1.0 NRC and 39 dB CAC—the best sound-performing ceilings in the region.

# CEILINGS

## WOOD WOOL CEILING

A wood ceiling is one of the most adaptable ceiling solutions, as it can be used in both traditional and contemporary designs.

USG Middle East Skynest wood wool ceiling collection provides excellent thermal and sound insulation. Our wood ceilings are FSC and PEFC

certified as environmentally friendly, so you are on the right side of sustainability.

Skynest wood wool ceilings offer great fire resistance and long-term durability and are available in a large selection of panel designs, size textures, and finishes.

## MINERAL FIBER CEILING

Your imagination will come to life with our mineral fiber ceilings. With over 35 years of experience in mineral fiber acoustical ceiling systems, USG Middle East is the sole mineral fiber ceiling producer in the MENA region. We offer more than 30 mineral fiber ceiling designs that cover a wide range of sound absorption, light reflectance, and fire performance—and all meet the industry standards

and requirements.

USG ME mineral fiber products are classified according to ASTM E1264 and are CE marking per EN13964—making it easy to compare various types of ceiling systems.

Acoustical false ceiling designs vary from perforated acoustic ceiling tiles to fissured designs to non-perforated tiles according to the architect's specifications and contractor's needs.

## **GYPSUM CEILING TILES**

---

USG Middle East gypsum tiles are an economical and sustainable ceiling solution with an array of beautiful perforation patterns. We offer a wide variety of gypsum products available in painted and laminated finishes in plain and perforated designs. They are easy to trim and install in a variety of edge details with

excellent mold and sag resistance, fire resistance, and durability.

We provide standard perforation patterns in addition to non-standard patterns as per the architect's design. The USG Middle East team is always willing to accommodate contractors' and architects' special design requests.

## **SUSPENDED CEILING GRID**

---

Compatible with all our acoustical ceiling tiles of drop ceilings, USG Middle East Donn® and Quadra Brands acoustical suspension systems are produced with the highest standards. They are full systems with hanging accessories to ensure both structural and aesthetic integrity in all ceiling designs. Our acoustical suspension systems are designed and manufactured according to the architect's specifications and contractor's needs.

Donn® and Quadra Brand acoustical suspension systems are certified to meet the most stringent national standards and comply with all relevant building codes and norms according to EN10346 and ASTM A653. Available in different designs and types to meet the needs of all projects. From narrow to wide facing, steel or aluminum—you have a wide variety of choices available from USG Middle East.

# PLASTERBOARD

## SKYROCK BRAND GYPSUM BOARD

Skyrock Brand Gypsum Boards are an economical, asbestos-free product offered by USG Middle East. Produced at a standard dimension of 1200mm x 2400mm x 12.5mm / 15mm, each board is composed of a noncombustible gypsum core, and encased in a heavy natural-finish paper on the face side and a strong liner paper on the backside. Skyrock Brand Gypsum Boards are

available with a regular core for commercial or residential applications where regular panels are desired and with fire-rated core boards when fire-rated wall and ceiling assemblies are required.

Skyrock Brand Gypsum Boards are available in a moisture-resistant option and a fire-resistant option as well.

## SHEETROCK® BRAND GYPSUM BOARD

USG is your one-stop shop for gypsum board products. As one of the industry's leading gypsum board manufacturers, our USG Sheetrock® technical Gypsum Board brand is an example of the quality we provide to meet your project's specifications. Our technical Gypsum Board contains a wide range of Sheetrock® gypsum boards made of a noncombustible gypsum core warped in 100%

recycled face and back papers to form a high strength composite design.

The natural finish face paper is folded around the long edges to reinforce and protect the core with square and even cut edges, allowing joints to be reinforced and concealed with USG Middle East Sheetrock® Brand joint treatment systems.

# SUBSTRATES

## SECUROCK® BRAND GYPSUM BOARD

One of the best drywall substrate solutions we offer builders and contractors is Securock® Brand Gypsum Board. Made of moisture- and mold-resistant gypsum core encased in a moisture- and mold-resistant glass mat. Available in a variety of thicknesses.

We offer a superior tile bond that holds up to 75kg per square meter in cladding and scores a 10 out of 10 on the ASTM D3273 test for resistance to

mold and mildew under ideal fungal growth conditions.

Securock® Brand Gypsum Board is UL Classified for fire resistance, surface-burning characteristics, and non-combustibility. It is used in both exterior and interior areas, wet areas, Shaftwall, and low-slope roofing systems.

Our Securock® Gypsum Board panels provide long-lasting durability and resistance to mold and moisture.

## SOLIDROCK & FIBEROCK® WALLBOARD

Builders, architects, and project managers can count on USG for abuse-resistant gypsum panels. We offer a comprehensive selection of these products—including the trusted Solidrock and Fiberock® brands ideal for interior applications. Install our versatile products in high-traffic areas for durability as well as water and fire

resistance. Solidrock Fiber Cement boards provide excellent resistance against fire, termite, and moisture, ideal for a variety of interior and exterior applications. Fiberock® Brand Interior Panels are high-performing and resist moisture, mold, and fire as well as dents and penetration.

## DUROCK® WALLBOARD

Wet areas won't be a complex challenge for you anymore. Durock® Brand Cement Board provides architects, builders, and tile contractors a strong, water-durable tile backer board for floors, walls, countertops, tub, shower areas, and exterior finish systems in new construction and remodeling. Via the ASTM G21 test, Durock® Brand Cement Board provides superior mold resistance with zero mold growth. Durock® Brand Cement Board

scores a 10 out of 10 on ASTM D3273 for resistance to mold and mildew propagation under ideal fungal growth conditions.

Durock® Brand Cement Board cuts easily and installs quickly with Durock® Brand tile Backer Screws, self-drilling fasteners, or nails. The Durock® cement board provides enhanced, proprietary edge performance that prevents spinout and crumbling and comes with a 30-year limited warranty.

# METAL FRAMING

## DRYWALL PARTITIONS METAL FRAMING

Thanks to our drywall metal framing products, plasterboard installation is now easier and straighter than ever. They are made from an environmentally friendly metal material, and like the rest of our metal products, they are 100% recyclable. USG Middle East drywall metal framing products and accessories include, but are not limited to: Studs, Runners, Deflection Heads, Curved Tracks, Bracings, Corner

Beads, and Metal Trim. All of our drywall metal framing products meet a wide range of construction requirements for high-quality internal wall and ceiling finishes. Find the metal framing tools you need for long-term stability and select from a variety of USG Middle East Drywall metal framing products to use in your building projects.

## DRYWALL CEILINGS METAL FRAMING

USG Middle East Drywall Ceiling Suspension System provides a uniform appearance and excellent ceiling stability. This concealed framing system is intended for the installation of high-quality regular, fire-rated, and acoustic gypsum board ceilings. The system is made from galvanized metal components with a zinc coating in a variety of thicknesses, so rust and corrosion will not be a problem for you.

We offer a complete suspension system that includes ceiling partitions and accessories including, but not limited to: Drywall Suspension, Perimeter Channels, Primary Channels, Furring Channels, Drywall Shadow Angles, and other drywall ceiling suspension systems parts. We provide you with a complete drywall ceiling system for long-term efficiency, saving you time and additional maintenance costs.

## SHAFTWALL METAL FRAMING

Shaftwall Metal Framing products are part of the standard USG Middle East product line. We manufacture and market the Shaftwall Framing Systems—CH Stud, Shaftwall Framing Systems, J Runner/J Strut, and the E Stud. All are made from sustainable materials and used to create safe, durable Shaftwall elevators, stairwells, and vertical mechanical chases in high-rise construction. Our Shaftwall

Metal Framing can be installed for vertical and horizontal encasement applications. With the help of a variety of mold, moisture, and fire-resistant gypsum and cement boards that USG Middle East offers, the result will be thinner and lighter walls that can withstand high lateral loads and improve acoustic performance.

# INTERIOR FINISHES

## CONVENTIONAL WEIGHT JOINT COMPOUNDS

USG Middle East conventional weight joint compounds provide professional-grade performance. Sheetrock® Brand All Purpose Joint Compound and Premium Premix combine convenience in a single package with high-quality adhesive performance for drywall applications. These compounds are a ready-mixed vinyl formulation for embedding Drywall Joint Tape and filling and finishing coats in interior gypsum panel applications. They are also

designed to cover corner bead fasteners trim, skim coating entire gypsum panels' surfaces, and for hand applying simple textures. As worker safety is a top priority for us, this joint compound is low VOC emitting and meets ASTM C475 for Standard Specification for Joint Compound. With our conventional-weight joint compounds, you can be assured of excellent results with your drywall finishing.

## LIGHTWEIGHT JOINT COMPOUNDS

Lightweight all-purpose compounds are ready-made mixes that weigh up to 30% less than conventional-weight compounds, making handling and application simpler, easier, and faster. These compounds provide all the benefits of conventional-weight compounds while having less shrinkage and are easier to sand. Sheetrock® Dust Control Joint Compound and Sheetrock® Brand Joint Compound are excellent choices

for renovation projects because of the embedded joint tape paper and clean finish on panel joints. Sheetrock® Dust Control Joint Compound is made of a unique formula that forms a fine residue during sanding, allowing each job to be completed faster and cleaned up quicker with less irritation and inconvenience from airborne sanding. We provide you with high-quality products that meet your needs.

## SETTING-TYPE JOINT COMPOUNDS

Quick set times allow for one-day drywall finishing and next-day decoration of drywall in interiors and exterior areas. Let our collection set the pace with a range of formulations and setting times. Our joint compounds provide low shrinkage and superior bond, which make them excellent for projects involving laminated gypsum panels, acoustical gypsum boards, and above-grade

concrete surfaces. USG Middle East is your source for quality drywall finishing plasters. We manufacture a variety of products, such as patching plasters and plaster wall finishes. Whether you're working on a gypsum surface, cement plaster, or a concrete plaster surface, you're sure to find something in our portfolio.

# INTERIOR FINISHES

## BONDING COMPOUNDS

Our Setting-Type Bonding Compounds are a plaster-based adhesive formulated to bond gypsum board to masonry, brick, or concrete walls and for bonding decorative cornices to plaster surfaces and for reinforcing joints in cornices. These Premium Compounds are incredibly strong and durable. They mix easily to form a creamy, lump-free compound and provide

excellent adhesion to masonry, brick and concrete walls, and decorative cornices.

USG Plaster Bonder™ provides an enhanced plaster adhesion to surfaces like gypsum plaster, cinder block, stone, drywall panels, and similar materials. Plaster Bonder is easily applied by brush, roller, or spray to a uniform continuous film.

## PREPARATION SOLUTIONS

USG Middle East offers a wide range of preparation solutions for walls and ceiling applications. These solutions are preferred by our customers and partners due to durability and speed of application that saves time and reduces costs. Our high-quality interior wall putty offers a thin underlayment solution used to repair walls and ceilings

as crack fillers. Without the need for sanding, it produces a smooth finish ready for paint and decorative coatings.

Tuff-Hide Primer-Surfacer from Sheetrock® Brand is a unique primer that applies quickly and evenly with professional airless spray equipment and produces a bright, smooth Level-5 finish.

## ACCESSORIES

USG Middle East offers a full range of accessories for project builders. Our accessories range from jointing tapes for interior and exterior use that add strength and crack resistance for smooth concealment at flat joints and inside corners, to durable beads and trims that install easily by screwing, nailing, or taping to metal or wood framing. Our corner beads and trims protect external corners, angles,

and panel intersections in drywall construction. They are sealed with our joint compounds, delivering a smooth, finished surface that protects corners from impact. Check our access panels portfolio for various uses of applications of wet areas, fire resistance, Shaftwall access panels, and more solutions for specialized locations.

## SURFACING SOLUTIONS

Surfacing solutions give walls and ceilings a strong, hard surface that resists abrasion and surface cracking and provide significant savings on time and material during the finishing process.

Our surfacing solutions, such as Diamond® Veneer Finish, are perfect for light commercial and residential construction and high-rise buildings. Diamond® Veneer Finish offers a fire

rating of up to four hours and sound-rated assemblies of up to a 62 dB STC rating.

The Imperial® Veneer Finish creates strong, abrasion-resistant interior finishes ideal for withstanding the bumping and scuffing of high-traffic areas. The surfacing solutions are high-strength and yield exceptionally hard surfaces.

## FINISHING SOLUTIONS

We don't squander your time or money. We offer finishing solutions as part of the acoustical plasterboard ceiling systems. We provide this in addition to those that require special finishing materials to achieve a specific acoustic quality.

Our Finishing Solutions are an exclusive, sound-rated interior spray-applied texture finish for ceilings and other non-contact surfaces over basecoat plaster, concrete, metal

decks, and gypsum panels. Ensemble Spray Applied Finish and Monosilent Spray Applied Finish are aesthetically transparent spray-applied finishes with specially formulated low shrinkage joint compounds for acoustical plasterboard ceilings. Our finishes are all applied with a pneumatic spray that yields a fine finish and a smooth texture. Available in an array of colors.
